

Global perspective. Independent thinking.

### Engineering, Testing & Manufacturing Services

# Manufacturing

APS's machining center offers center-boring, deep-hole drilling, robotic rotary stub welding, straightening, hammer peening and roller burnishing, milling and turning up to 5 axes, lathe turning, honing, wire EDM, ECM deburr and laser engraving all under one roof. This results in superior process control for all of our standard and custom products. Our fully-equipped clean room and lab can build any downhole or surface assembly.
